Jerit Norville

Founder & CEO @ Greenchainz | Sustainable Construction, Green
Building
Danville, Virginia, United States

Summary

I'm building GreenChainz—the first B2B marketplace for verified
sustainable building materials.

The problem I'm solving:

Architects, engineers, and contractors are under immense pressure
to build sustainably, but they waste days (sometimes weeks) chasing
down fragmented sustainability data across dozens of manufacturer
websites. EPDs, carbon footprints, FSC certifications, LEED credits
—it's all scattered, inconsistent, and unverified.

The result? Projects get delayed, sustainable materials get
overlooked, and the construction industry misses its climate targets.

The solution:

GreenChainz is a centralized, data-rich B2B marketplace that
aggregates verified sustainability data and connects decision-makers
directly with suppliers. We're building the infrastructure for the future
of sustainable construction—one verified material at a time.

Our core value proposition: verifiable data + streamlined
procurement workflow.

For architects and engineers: A comprehensive database and
decision-support tool that de-risks specification and saves time.

For material suppliers: Direct access to a highly targeted audience
of qualified buyers, with lower marketing costs and higher lead
generation efficiency.

What I'm focused on right now:

• Securing data partnerships with EPD International, WAP Sustainability, FSC, and other certification bodies
• Onboarding our "Founding 50" anchor suppliers
• Building our MVP with verified sustainability data at the core

Beta launching Q1 2026.

If you're in the AEC industry, a sustainable materials manufacturer, or passionate about climate tech, let's connect. I'd love to hear how you're navigating the green construction landscape.

Experience

Greenchainz
Founder & CEO
July 2025 - Present (6 months)
Richmond, Virginia, United States

Building the first B2B marketplace for verified sustainable building materials in the Architecture, Engineering, and Construction (AEC) industry.

Key initiatives:
• Securing data partnerships with EPD International, WAP Sustainability, FSC, and certification bodies to create the industry's most comprehensive verified materials database
• Launching "Founding 50" supplier program to onboard anchor manufacturers
• Developing API-first, headless architecture (Vercel + Supabase + Cloudflare stack)
• Targeting 200 architect users and 50 suppliers by Q1 2026

Our mission: Make sustainable construction procurement simple, verifiable, and efficient.

TekaByte Solutions
Information Technology Support Technician
2025 - Present (less than a year)

Set up new laptops and workstations (Windows 10/MS365)

Password resets, printer setup, troubleshooting

Responded to remote user email/ticket requests

Documented solutions, learned under supervision

Allied Pallet Repair
Customer Service Assistant
2021 - 2023 (2 years)

General labor, organization

Handled inquiries, made flyers/social posts for hiring

Tracked lists, supported onboarding

Perdue Chicken
Line Worker
2017 - 2021 (4 years)

Reliable team shift work

Problem-solving on production line

US Army
Communications Operator
2000 - 2002 (2 years)

Discipline, teamwork, early tech skills

―――――

Education

Western Governors University
Bachelor of Applied Science - BASc, Computer and Information Sciences and
Support Services · (August 2024 - November 2026)

Construction Management Association of America
Certificate, Certified Construction Manager · (January 2016 - January 2018)
